

# Heavy Industrial Construction

Hangar 6, Brunswick Naval Air Station

Since 1947 The Sheridan Corporation has been providing Maine industry with high quality heavy industrial construction. Sheridan, in association with Butler Manufacturing Company, can offer the benefits of local design, permitting and construction expertise with the strength and support of a nationally recognized metal building designer and fabricator. By combining the strength of mill steel for the primary structural members with the performance and value of pre-engineered secondary and cladding systems we can deliver the lowest in-place cost building system to meet your requirements.

General Electric Diaphragm Fabrication Facility

Sheridan can provide a complete scope of services for your project including:

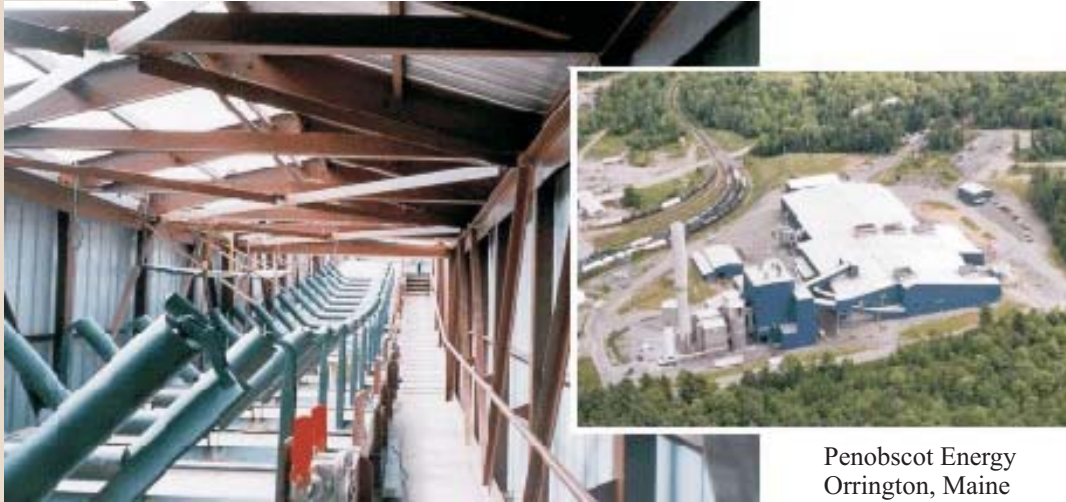

- Design/Build Services
- Engineering and Permitting
- Construction Management
- Turn Key Construction

The Sheridan Corporation

33 Sheridan Road, Fairfield, Maine 04937 - or - 739 Warren Ave., Portland, Maine 04103  
207-453-9311 - or - 207-774-6138

# Heavy Industrial Construction

In addition we are able to provide special facility requirements such as heavy auxiliary loads, 50 to 600 ton and more overhead cranes, custom paint systems, seismic loadings, concrete pits and pedestals for heavy equipment and large clear spans to name just a few.

Penobscot Energy  
Orrington, Maine

Our skilled team of engineering sales managers can assist you in selecting the best structural design elements to fit your individual needs. Using the latest in computer aided estimating systems we can provide you with fast, accurate cost estimates that will determine project costs up front which will save you time and dollars. If you already have estimates on a structural system we are able to offer a Sheridan-Butler value engineered alternative which in most cases will result in significant savings.
