The Sheridan Corporation receives \$90 Million Dollar Builder honor from Butler Manufacturing™

Kansas City, Mo., February 9, 2019 – The Sheridan Corporation, a general contractor in Fairfield and Portland, Maine, has reached the **\$90 million dollar sales level** with Butler Manufacturing™. Butler provides design-build construction solutions and innovative building technology to the nonresidential market. This designation is awarded to Butler Builder® dealers who meet or exceed annual territory sales goals and demonstrate superior marketing skills in selling Butler® building systems.

Founded in 1947, The Sheridan Corporation has 110 employees and has been an authorized Butler Builder for 72 years. Recent projects include Hytek, Inc. in Gray, Maine, and J.B. Brown/Saunders in Westbrook, Maine.

About The Sheridan Corporation

Sheridan is the third oldest authorized Butler products representative in the world and has been performing quality engineering and construction services for the commercial, industrial and institutional building markets since 1947. Sheridan provides all means of construction delivery methods for its clients including permitting assistance and design engineering solutions.

About Butler Manufacturing™

Butler Manufacturing™ provides a comprehensive combination of design-build construction solutions and innovative building technology to the nonresidential market. Every Butler® building solution is backed by unrivaled research and testing, ensuring that Butler building systems perform to the highest standards. Through a network of more than 1,400 Butler Builder® dealers worldwide and corporate accounts services, Butler addresses the demand for environmentally friendly and energy-efficient design in community, commercial and industrial buildings. Butler is headquartered in Kansas City, Missouri, and is a division of BlueScope Buildings North America, Inc. For more information, visit www.butlermfg.com.
