Center for All Seasons

Summer fun with year round recreational, educational and social activities

Sheridan Construction Corporation is pleased to have worked with the residents of Belgrade, Maine and Port City Architecture in the design and construction of the new "Center For All Seasons" – a year round, multi-use recreational facility.

Off route 27 on the shores of Great Pond, the new facility has an in-ground pool, tennis courts, play grounds, swimming and boating areas and lots of room for expansion on a 7.7 acre lot.

The center features a full size gym, social room, kitchen and covered porch, as well as a beautiful picnic area leading to public swimming at Great Pond.
