

Location: Fairfield, Maine

Job Type: Full Time / Competitive salary commensurate with experience

**Company:** Sheridan Construction, founded in 1947, is a premier full-service building construction company promoting quality, hard work, integrity, honesty, and dedication to its clients and personnel.

**Position Description:** Sheridan's Engineering Department serves a supporting role in the construction and sales efforts of the company. Preliminary designs, presentation materials, permitting, final design, material takeoffs, detailing, problem-solving, and construction support are some of the activities performed by the department. The Civil Engineering / Director of Permitting position performs the site design and environmental permitting tasks required of the department.

### Essential Functions & Responsibilities:

- Designs construction projects by studying project concepts, architectural drawings, and models.
- Prepares engineering design by collecting and studying reports, maps, drawings, blueprints, aerial photographs, and tests on soil composition, terrain, hydrological characteristics, and related topographical and geologic data.
- Determines project costs by calculating labor, material, and related costs.
- Prepares feasibility study by analyzing engineering design, conducting environmental impact studies, and assembling data.
- Prepares engineering documents by developing construction specifications, plans, and schedules.
- Confirms adherence to construction specifications and safety standards by monitoring project progress, inspecting the construction site, verifying calculation, and placement.
- Prepare, submit, and obtain approval of environmental permit applications.
- Attend Planning Board meetings and meet with AHJ's as required to obtain project approval.
- Provides engineering information by answering questions and requests.
- Complies with federal, state, and local legal requirements by studying existing and new legislation, anticipating future legislation, enforcing adherence to requirements, and advising management on needed actions.
- Maintains project data and drawings.
- Contributes to team efforts by accomplishing related tasks as needed.

### Essential Qualifications:

- 15 years' experience with 5 years as a Senior Structural Engineer
- Excellent knowledge of design and visualizations software such as AutoCAD, RISA, Enercalc, MathCad, Profis, and MS Office
- Familiarity with design codes, rules, regulations, best practices, and performance standards
- Ability to work with multiple discipline projects
- Project management and supervision skills
- Decision-making ability and leadership skills
- Time management and organization skills
- BS degree in Civil Engineering
- Current engineering license

### Benefits:

- 401(K) Company Match
- Health & Vision Insurance
- Life & Disability Insurance
- Paid Time Off / Earned Paid Leave
