

Sheridan
Construction

Kennebec Savings

Waterville, Maine

Client Name

Kennebec Savings

Delivery Method

General Contractor

Designer

FCI Associates, INC. & Architects of Natick,
Massachusetts

Project Size

11,550 sf

Kennebec Savings has partnered with Sheridan Construction to build an 11,550-square-foot addition onto their current brick building.

In the early stages of this project, Sheridan had to perform concrete work during the course of the winter months. Protecting the basement foundations from frost damage proved to be very difficult, though Sheridan was able to complete this project without any foundational damages.

As the General Contractor on this project, Sheridan was responsible for the construction of the Brick exterior cladding with steel and wood structural framing, designed by FCI Associates.

Building on our promise.
