Morris Yachts

Trenton, Maine

Client Name
Morris Yachts

Delivery Method
Design-Build

Designer
Sheridan Construction

Project Size
9,750 sf

Morris Yachts has partnered with Sheridan Construction to build a 9,750-square-foot Butler addition to their current standing building.

This new project featured (2) 6-ton Bridge Cranes, and a 2,340-square-foot mezzanine. Additional features in this project include Ducked ventilation systems for dust and fumes, as well as Large overhead doors (26'x20') to accommodate large boats.

Throughout this project Sheridan self-performed the foundation, metal building erection, misc. metals, and interior carpentry.

Building on our promise.
