# New Balance Outlet Store

Oxford, Maine

## Client Name

New Balance

## Delivery Method

Construction Manager

## Designer

ADD, Inc.

## Project Size

17,650 sf

New Balance selected Sheridan Construction as the Construction Manager on new 17,650-square-foot factory outlet store in Oxford, Maine.

This complex building required the use of many different building materials to complete. Materials used on the envelope of the building include glass curtain wall at the front elevation. Strip windows at the clerestory and several types of stained wood clapboards for siding. The canopy uses heavy timber structural elements with touches of granite and steel siding.

**Building on our promise.**
