TFH Architects

Size

15,000 sf

The Waterville Opera House has been Central Maine's cultural center since 1902, treating audiences of all ages to the magic of performing arts. With an 800-seat venue it has been host to theatrical productions, ballet performances, concerts, vaudeville and comedy acts.

Sheridan Construction did the renovation project at the venerable hall that included the improved acoustics, new balcony seating, new flooring, restored woodwork, new technical equipment, a new set shot, dressing rooms and a 2-ton freight elevator that goes directly to the stage.

Building on our promise.
