

**Sheridan
Construction**

Field House

Brunswick, Maine

Client Name

Bowdoin College

Delivery Method

General Contractor

Designer

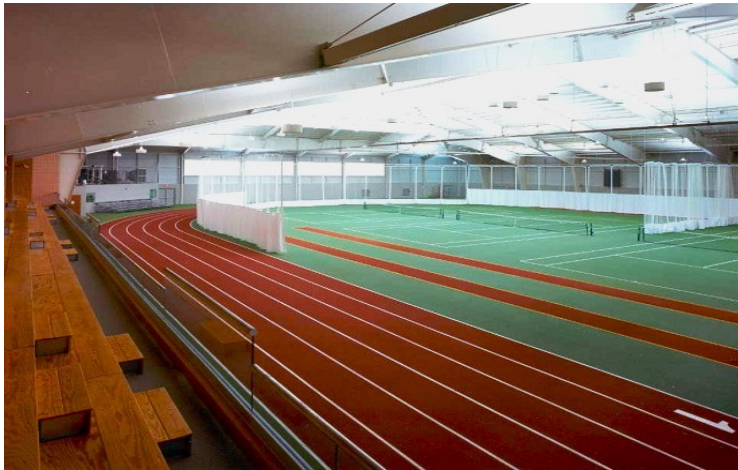

Sasaki Associates

Project Size

60,000 s.f

Bowdoin College and Sasaki partnered with Sheridan Construction, to bring their students a new 60,000-square-foot field house.

This Butler pre-engineered structure features an exterior track, surrounding multiple tennis courts. This building also features a 14,000-square-foot pool building, which houses a 75' X 114' sixteen-lane pool with three diving platforms. Connecting the two structures is a two-story entry core, which features office space and supporting functions. This project was completed in 1989, and has served the Bowdoin campus for decades following its completion.

Building on our promise.
