Construction

Butler Brothers

Lewiston, Maine

Client Name

Butler Brothers

Delivery Method

Design-Build

Designer

Sheridan Construction

Project Size

61,000 sf

Butler Brothers partnered with Sheridan Construction on two projects to design and build a new 61,000-square-foot warehouse facility.

Butler Brothers' new building features new and improved warehouse space, in addition to a new showroom and expanded office space.

Additionally, new loading docks were added to better facilitate the transit of their products.

Sheridan Construction self performed the erection of the new Butler metal building, which features a double sloped MR-24 roof system.

Building on our promise.
