Diamond Phoenix designs, manufactures and integrates carousel storage and retrieval systems and other material handling products and equipment.

Sheridan Construction designed and built this new facility consisting of 85,000 square feet of manufacturing and fabrication space that includes state-of-the-art powder-coat painting facilities and extensive bridge crane systems. The new corporate offices are 11,000 square feet. Attached to the manufacturing building, this space consists of sales, engineering, project management, service and business offices as well as a cafeteria, exercise room and employee locker rooms.

Building on our promise.
