Construction

## F.W. Webb

South Portland, Maine

### Client Name

F.W. Webb

### Delivery Method

Design-Build

### Designer

Sheridan Construction

### Size

66,800 sf

Designed and Constructed with Butler Pre-engineered steel, Sheridan brought F.W. Webb a new 66,800-square-foot building in South Portland, Maine.

This new multi purpose building features warehouse space, loading docks, a new retail showroom, as well as additional administrative office space.

Two years after completing the South Portland facility, Sheridan and Butler had also been selected to construct the new Augusta facility.

**Building on our promise.**
