Sheridan Constructed, Designed and built the Global Village Headquarters in Yarmouth, Maine.

Featured in this project is a 42-foot in diameter globe, 50,000 square-feet of office space, and 37,000-square-feet of warehouse space.

During the construction of this project, Sheridan faced many challenges along the way. At the forefront of these challenges being fitting a 42-foot globe within a 40-foot building. In order to overcome this challenge, Sheridan constructed a recess pit in the globes base.

**Building on our promise.**
