Construction

Goodall Hospital

Sanford, Maine

Client Name

Goodall Hospital

Delivery Method

Design-Build

Designer

Sheridan/ Grant Hays Assoc. / Lavallee brensinger Architects

Size

50,000 sf

Sheridan Construction designed and built a 50,000-square-foot, two-story addition onto a historic 1927 hospital wing at Goodall Hospital in Sanford, Maine.

Sheridan's final design delivered large bright medical suites for family medicine, obstetrical and gynecological practices. Each suite consisted of exam and procedure rooms, small labs, private offices with conference rooms and work areas for clinicians, nurses and secretarial staff.

Following the completion of Goodall's medical building, Sheridan has been invited back to complete further renovations at Goodall Hospital, solidifying a fantastic partnership between Sheridan and Goodall Hospital.

Building on our promise.
