

Sheridan
Construction

Fire Station

Southwest, Maine

Client Name

Southwest Fire Department

Delivery Method

Construction Manager

Designer

Harriman Associates

Project Size

9,480 sf

In Southwest Harbor, Sheridan worked with local selectman to bring the town a new 9,480-square-foot fire station.

This new facility includes a dispatch room, lobby, and five apparatus bays with a custom-designed exhaust mitigation systems.

Additionally included in this project is workshop space, which includes storage and repair capabilities for the town's antique fire engine. Furthermore, this space includes training rooms, laundry unit, and office space.

Building on our promise.
